Resistant

Light

Low Coefficient of Expansion

Low Maintenance

A person's feet are visible at the top of the frame, jumping rope on a wooden deck. The rope is in motion, creating a white, curved shape above the deck. The deck is made of brown, textured planks that recede into the distance. In the background, there are green plants and flowers, including purple and yellow ones, under a bright sky.

Decking

Decorate your balcony, porch, garden, patio or courtyard with an innovative eco-friendly WPC decking system available from Wooden Eco Life. It is not only affordable, and guaranteed to last, but also beautiful and easy to install.

Timeless beauty...!

Anti Slippery Decking...!

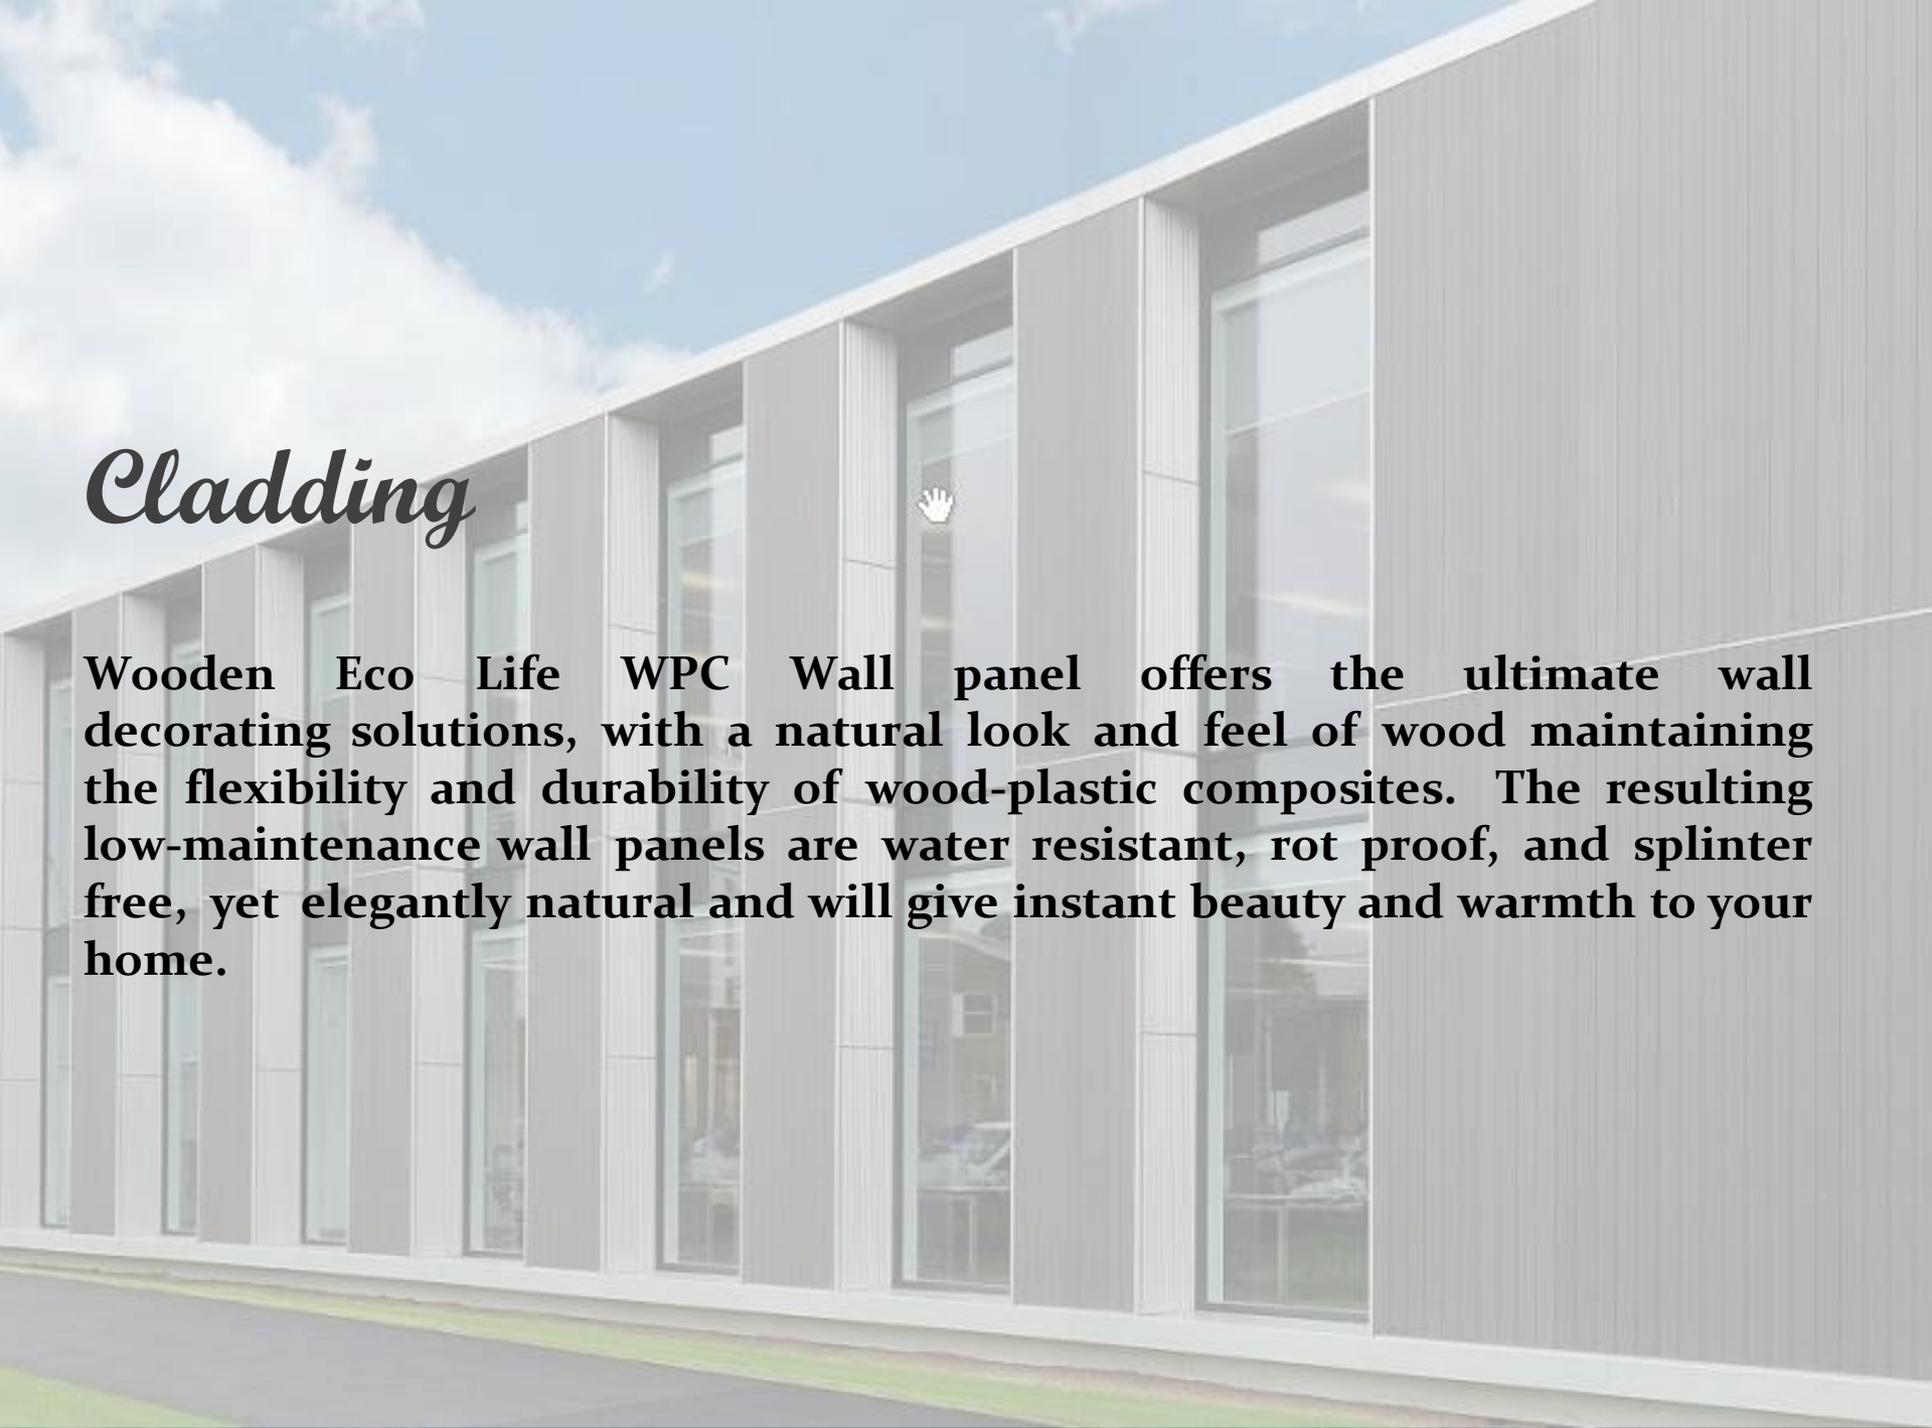

Waterproof Outdoor Decking...!

A modern building facade featuring large windows and grey vertical cladding panels. The building is set against a blue sky with white clouds. The cladding panels have a wood-grain texture. The windows are large and rectangular, reflecting the sky and surrounding environment. A small white hand cursor is visible on one of the windows.

Cladding

Wooden Eco Life WPC Wall panel offers the ultimate wall decorating solutions, with a natural look and feel of wood maintaining the flexibility and durability of wood-plastic composites. The resulting low-maintenance wall panels are water resistant, rot proof, and splinter free, yet elegantly natural and will give instant beauty and warmth to your home.

Deck Tiles

Woodenecolife DIY (Do It Yourself) tiles are an alternative option to traditional decking and tiling since these pieces come in various sizes and are the easiest to install. Our WPC DIY deck tile system consists of tiles that can be quickly and easily installed to form a nice, neat and professional look that is guaranteed to satisfy you.

Feel like wood...!

Garden Tiles...!

Terrace Tiles...!

Door Frame

WoodenEcoLife Door frame is elegant as any premium wood in appearance. It is equally workable, can be nailed, screwed, drilled, glued, sawn or tapped just like wood. WEL Door frame are corrosion proof, Rot resistance, Termite resistance and water resistance. so Durability of door frame is high as compare to wooden door frame.

Siding

WoodenEcoLife fence is a practical solution your space into a beautiful outdoor living area with valuable privacy and protection. Without moisture damage fear, wood composites profiles offer the advantages of strong, long lasting and not rotting fencing system with low maintenance cost.

Pergola

WoodenEcoLife Pergolas have a unique formula that provides the very best of both worlds, a long lasting material that is strong, durable and weathers extremely well. The combination of a beautiful traditional wood appearance and long lifespan makes WPC Pergolas the obvious choice for new or replacement projects.

Eco friendly...!
